Part 2 - Test with FieldWorker Pro

The PLGR should now be ready to communicate with FieldWorker Pro Software on the Newton MessagePad. To test, hook the Newton up to the PLGR, Start the PLGR, start the Newton and FieldWorker ("FW Pro" icon).

Select the "i" icon in the lower left corner of the screen. Select **GPS Test** from the menu then the "test" icon. If the connection is working, data will begin to scroll in the window, e.g., \$GPGGA 0,00 M M *66.

To close out of the test session select the "test" icon then "x" to close.
